**Subject:** My opinion.

Dear readers,

I feel that I should write an e-mail like this because I would like you to know my thoughts about the MS/DOJ case that has been going on. I strongly feel that the DOJ has done an astonishing work for the settlement of the Microsoft case. The Microsoft company had to go to justice and be judged. The company didn't know how to play the role respecting other companies. The monopoly was getting huge and many other few companies were going down because of that. Users now have the free opportunity to choose wether to use Internet Explorer or not since it can be deleted. Other small companies now have the spot they never had before. I really believe that Microsoft is gonna have to work harder than never to keep up with rival softwares and companies. It means better products from Microsoft and more space for the others.

Congrats,  
Ravi.
